### Outsourcing summary table Shared data and data location

IT	<b>Anti-Money Laundering, Terrorist Financing, Fight against corruption Market abuse</b>	<b>Credit and Risk Management and default management, recoveries and litigation</b>	<b>Centralized databases</b>
<b>Description of contracted service</b>			
Enable IT providers to maintain, develop, host the IT infrastructure of SG Luxembourg.	Enable the conduct of analyses and controls in accordance with applicable international laws and standards on the identification of clients and beneficial owners and the fight against money laundering and terrorist financing (monitoring national and international lists, combating corruption and preventing market abuse) both when opening an account and when monitoring the client relationship.	Enable the monitoring of client commitments, the associated level of risk, individually and in a consolidated manner, for the management and monitoring of unpaid payments and defaults, as well as the processing of recoveries and disputes arising therefrom.  Enable the control and supervision of the resulting risks.	Enable the sharing of data within centralized databases, hosted, managed and maintained at Societe Generale group level.
<b>Nature/type of data shared</b>			
The data transferred concern all data relating to the business relationship with a client and include in particular his identity, IBAN number, details of transactions, account balances, relationships with third parties associated with the client's account, and more generally all data collected by SG Luxembourg relating to the management of the business relationship.	The data concerned relate to all the identification data of the client (identity, personal documents such as the identity card or passport and more generally all the identification elements of a person such as the date of birth, country of residence and others) its beneficial owner(s) and, where applicable, its managers in the case of a legal person.	The shared data covers all the identification data of clients (identity, accounts, addresses, buildings, property, etc.), associated persons (beneficial owners, guarantors and others) and their property (addresses of residence, buildings, etc.).	The data concerned relate to the identification of "corporate" or "legal persons" clients and their countries of business relations within the Societe Generale Group.
<b>Data Location</b>			
All data is securely hosted on the bank's servers or Service Providers' servers (including the cloud). Service Providers can access the data to perform specific maintenance, development, integration and other tasks. The Service Providers concerned are:  - Entities of the Societe Generale group <sup>1</sup> - Service Providers working on the IT environment having the status of support PFS or on an ad hoc basis to meet the specific needs of IT service providers established in Europe or in Canada and bound by a strict confidentiality obligation.	The data may be accessed by various Societe Generale group' entities in all countries where the group is established, as defined in the group's activity report available on the parent company's website <a href="http://www.societegenerale.com">www.societegenerale.com</a> , to meet the regulatory requirements listed below:  - Anti-money laundering - Financing of terrorism - Fight against corruption - Market abuse.	The data may be accessed by various Societe Generale group' entities in all countries where the group is established, as defined in the group's activity report available on the parent company's website <a href="http://www.societegenerale.com">www.societegenerale.com</a> to meet the needs of monitoring and consolidated supervision in the areas listed below:  - Credit and Risk Management - Default management - Recoveries and litigation.
